PROFESSIONAL SUMMARY

Results-driven Information Technology Graduate (GPA 3.8, Honors) with expertise in building scalable full-stack web applications and integrating artificial intelligence solutions. Experienced in developing secure, high-performance platforms using React, Node.js, and Laravel. Proven track record of delivering complex projects, including LMS platforms and AI advisory systems, with a strong focus on modern UI/UX, secure coding practices (OWASP), and cloud deployment (AWS, Vercel).

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Vue.js, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, PHP, Laravel, Python (FastAPI, Flask)

Database: MySQL, PostgreSQL, MongoDB, Redis, Firebase, Prisma

AI & ML: OpenAI API (GPT-4), Prompt Engineering, Scikit-learn, Pandas, NLP Basics

DevOps & Cloud: AWS, Docker, Git, CI/CD, Vercel, Netlify, Nginx

Security & Architecture: JWT, OAuth 2.0, OWASP Top 10, RESTful APIs, GraphQL, MVC, Microservices

PROFESSIONAL EXPERIENCE

Full Stack Developer & AI Integrator

Freelance / Remote | 2023 – Present

- Delivered 10+ web applications for clients in healthcare, education, and business sectors.
- Built scalable React, Next.js, Laravel, and Node.js applications.
- Integrated OpenAI-powered AI assistants and automation workflows.
- Implemented JWT authentication, RBAC systems, and secure REST APIs.
- Deployed production applications using AWS, Docker, and CI/CD pipelines.

PROJECTS

Employee Performance Review System — Graduation Project

Laravel 11, Vue.js, MySQL, Laravel Breeze, Tailwind CSS | Grade: Excellent

- Developed a complete performance review platform connecting HR, managers, and employees in a structured, transparent workflow that eliminates permission conflicts and lost evaluation steps.
- Built dynamic evaluation forms supporting 360-degree feedback loops with automated score calculations, enabling fair and data-driven performance cycles aligned with company goals.
- Designed a comprehensive analytics dashboard with performance reports and score sheets, providing management with quick, actionable insight into workforce performance.
- Implemented precise RBAC permissions, secure authentication via Laravel Breeze, and task/deadline notifications in a fully responsive interface built with Vue.js and Tailwind CSS.

AI Executive Board Advisor

NestJS, Next.js 14, PostgreSQL, Redis, BullMQ, OpenAI GPT-4o, Framer Motion

- Engineered an advanced AI advisory platform simulating a full executive board with 20+ specialized personas (CEO, CTO, CFO, CMO) to help founders evaluate business ideas and reduce strategic risk.
- Built multiple conversation modes — Quick Mode, Full Board, and Debate Mode — with live WebSocket interaction, structured JSON outputs, and readable deliverables including SWOT reports and 90-day action plans.
- Implemented a professional scoring system with Redis and BullMQ queue management for reliable async processing, backed by a NestJS/PostgreSQL API and a responsive Next.js 14 frontend with Framer Motion animations.

Integrated E-Learning Platform (EduPlatform)

React 18, TypeScript, Supabase, PostgreSQL, Google Gemini AI, Stripe, Zustand, Framer Motion

- Developed a high-performance LMS platform uniting 4 user roles (student, teacher, supervisor, admin) with interactive learning paths, XP-based gamification, and smart badges that boosted course completion rates by 50%.
- Integrated Google Gemini AI as a smart academic tutor, automatic PDF certificate generation, Stripe payments, secure video streaming, and comprehensive tools for curriculum building, question banks, and assignment grading.
- Leveraged Supabase for real-time data synchronization and precise RBAC, with Zustand/Redux state management and a responsive interface built with React 18, TypeScript, and Tailwind CSS — reducing administrative overhead by 70%.

OBSIDIAN Luxury E-commerce

React (Vite), TypeScript, Three.js, R3F, Tailwind CSS, Shadcn UI, Framer Motion, Stripe, Supabase

- Architected a luxury e-commerce platform with advanced visual effects including custom cursor, scroll animations, and Three.js (R3F) 3D elements to deliver a premium shopping experience that highlights product craftsmanship.
- Built a complete shopping flow with an attractive product display system, integrated cart and Stripe checkout, account and order management, and a wishlist feature — all within a cohesive luxury dark theme.
- Designed custom brand philosophy sections and a distinctive visual identity using React (Vite), TypeScript, Shadcn UI, and Framer Motion, with Supabase for backend services and Google AI integration.

Cloud ERP SaaS System (Multi-Tenant)

Next.js 16, TypeScript, Prisma ORM, PostgreSQL, Redis, BullMQ, NextAuth.js, Stripe, Docker, Caddy

- Built a production-ready, multi-tenant ERP SaaS platform with complete data isolation at both the application and database levels using Prisma ORM with a companyId identifier and NextAuth.js authentication.
- Developed modular business modules including a smart KPI dashboard, CRM with a visual sales pipeline, sales and invoicing with tax support and status badges, multi-warehouse inventory with serial tracking, and double-entry accounting with a flexible chart of accounts.
- Engineered a fully responsive RTL Arabic interface with dark mode using Tailwind CSS v4, shadcn/ui, Zustand, and TanStack React Query v5, with RBAC, audit logs featuring Visual Diff, global search, CSV export with BOM encoding, and Redis/BullMQ powering background tasks — deployed with Docker and Caddy.

EDUCATION

Bachelor of Information Technology

Al-Rayan University | 2021 – 2025

GPA: 3.8/4.0 · Honors Degree

CERTIFICATIONS

Responsive Web Design (FreeCodeCamp) · Front-End Development Libraries (FreeCodeCamp) · Back-End Development and APIs (FreeCodeCamp) · Scientific Computing with Python (FreeCodeCamp) · Introduction to AI (Edraak) · Microsoft SQL Server Databases (Edraak) · UI/UX Principles & Design (Edraak) · Ethical Hacking (SASS) · Cyber Security Basics (EVET)
